

BU Plus™

INSTRUCTIONS

Thank you for your interest in our new product.

One would use this solution as one does with most coin cleaning rinses by either placing the coin in a cup of the solution, and swishing about the surfaces of the coin with the "wetted" end of a cotton swab.

After applying the liquid and gently using a cotton swab, thoroughly rinse the coin with water, blot dry with paper towel, and allow to air dry for 20-30 minutes before placing in a new holder.

Please understand that this is a "base" type of solution and is "caustic", so please use carefully not to splash into eyes, or get on skin, hands, etc. In case of skin/eye contact, flush thoroughly with water. Do Not Ingest!

This type of cleaning rinse is essentially designed for XF/AU/BU to Proof coins. However; you may find very useful on lower grade circulated coins as well.

We were asked for a rinse that could be helpful on "Proof" surfaces, so we decided to go with this "base" type liquid similar to another known "base" solution, but a bit stronger to help with dirt, residue, cloudiness, etc.

If desired, you can dilute this solution with distilled water.

*For use on; Silver, Gold, Copper/Bronze, Nickel, Brass.

**Do not use on Aluminum.
